

Natrapharm

Dibencozide

Heraclene[®]

1mg Capsule
Vitamins

Formulation:

Each capsule contains dibencozide..... 1 mg

Actions:

Dibencozide increases the protein "efficiency coefficient", i.e., the percentage of "bound nitrogen" for protein build up in the body compared to "ingested nitrogen" with food intake. The initial sign of effectiveness is manifested by a marked increase in appetite.

Thus, dibencozide:

- facilitates optimum utilization of dietary protein intake
- contributes to the formation and repair of body tissues
- stimulates appetite

Indications:

Premature babies, low birth weight, retarded growth, poor appetite in infants, children and adults, adjuvant to treatment of tuberculosis and other chronic ailments, convalescence from acute infection or surgery, faulty nutrition in older people.

Dosage:

Premature babies and infants: 1 capsule daily (The capsule may be opened and the odorless, tasteless powder mixed with milk or juice).

Children and adolescents: 2 to 3 capsules daily

Adults: 3 capsules daily or as prescribed by the physician

Adverse Drug Reaction: No reported.

Special Precautions & Warnings:

Gastrointestinal (GI) conditions: Some GI conditions, such as ileal disease or surgical removal of part of the intestine, can reduce the amount of dibencozide that is absorbed from the intestine.

Interaction:

Dibencozide is a form of vitamin B12. Vitamin B12 is important for producing new blood cells. Chloramphenicol might decrease new blood cells. Taking chloramphenicol for a long time might decrease the effects of dibencozide on new blood cells.

Caution: Foods, Drugs, Devices and Cosmetics Act prohibits dispensing without prescription.

For suspected adverse drug reaction, report to the FDA: www.fda.gov.ph

Availability: Foil strip x 4's (Box of 28's, Box of 100's)

Registration Number: DR-XY19366-L

Date of Renewal of the Authorization: December 2018

Revision Date: January 2022
